

## Version 3.5

Support for the new Sonos Play:3

Updating couldn't be easier

### **On the Sonos Controller 200 and Sonos Controller for Mac or PC:**

- Sonos will automatically notify you when an update is available
- Select Update Now and click OK

### **On the Sonos Controller for iPhone and iPad:**

- The App Store will notify you when an update is available. Simply visit the App Store and install your system update

### **On the Sonos Controller for Android:**

- Your smartphone will notify you when an update is available. Simply click on the alert in the notification menu.

### **On the Sonos Controller 100:**

- Tap the Music button on your Controller 100 and click on System Settings
  - Select Online Updates and click OK
- 

## Version 3.4

Play Apple AirPlay® music sources on Sonos

It's the only true, multi-room Apple AirPlay® experience.

- Connect an Apple AirPort Express® to any Sonos ZonePlayer via line-in and wirelessly stream what's playing on your iPhone®, iPad™, or iPod touch® to any or every room.
- Party Mode. Send a song from your iOS device to multiple ZonePlayers throughout your home and enjoy that song in every room, simultaneously. Only with Sonos.
- Different songs, different rooms, Sonos style. Stream different songs from your iTunes library in different rooms. Only with Sonos.
- Experience superior 802.11n wireless performance, via SonosNet, using an AirPort Express. Only with Sonos.

Multi-task on your favorite iOS device

Start playing your music even faster with multi-tasking updates available on:

- Sonos Controller for iPhone
- Sonos Controller for iPad

Take control with the free Sonos Controller for Android app

Transform your favorite Android™ smartphone into a wireless music controller

- Find and play any song, in any room, right from your phone.
- Use voice search to find any artist, album or track by simply speaking into your phone.
- Type on the touch screen or physical keyboard to find your favorite artist, then browse through albums with a flick.
- View full-screen and thumbnail views of album art.
- Connects to Sonos over your home WiFi network.
- Download it for free from Android Market™.
- Available worldwide, in English only.

## Updating couldn't be easier

### **On the Sonos Controller 200 and Sonos Controller for Mac or PC:**

- Sonos will automatically notify you when an update is available
- Select Update Now and click OK

### **On the Sonos Controller for iPhone and iPad:**

- The App Store will notify you when an update is available. Simply visit the App Store and install your system update

### **On the Sonos Controller for Android:**

- Your smartphone will notify you when an update is available. Simply click on the alert in the notification menu.

### **On the Sonos Controller 100:**

- Tap the Music button on your Controller 100 and click on System Settings
- Select Online Updates and click OK

---

## Version 3.3

### More control: Sonos Controller for iPad™

Control Sonos from your large, touch screen iPad with a free app

- Control your entire Sonos system from any iPad over your home Wi-Fi network.
- View your zones, music menu, now playing pane, and volume controls all at once — in landscape or portrait mode.
- Quickly search for your favourite artists by typing on the virtual keyboard and browse through albums by pointing and flicking.
- Drag and drop to create playlists in an instant.
- View full-screen and thumbnail views of album art.
- Download it for free on the App Store.
- Available worldwide.

### Great radio: Support for streaming AAC

Added support for AAC means more radio stations to enjoy all over the house

- Tune in to over 1,000 additional stations in the Sonos Radio guide.

## Updating couldn't be easier

### On the Sonos Controller 200 and Sonos Controller for Mac or PC:

- Sonos will automatically notify you when an update is available
- Select Update Now and click OK

### On the Sonos Controller for iPhone and iPad:

- The App Store will notify you when an update is available. Simply visit the App Store and install your system update

### On the Sonos Controller 100:

- Tap the Music button on your Controller 100 and click on System Settings
  - Select Online Updates and click OK
- 

## Version 3.2

### New audio features: Crossfading and S5 Stereo Pairing

- **Crossfading:** Create smooth transitions between songs just like the DJs do. With crossfading turned on, the volume at the end of the first song fades out as the volume of the next song fades in. You can select the crossfading playback mode from the Now Playing screen for any tracks in your music library, plus select music services including Last.fm, Napster, Pandora, and Rhapsody.
- **S5 Stereo Pair setting:** Perfect for parties or really large rooms, this setting allows you to group two S5s in the same room so one S5 serves as the left channel and the other as the right channel.

### More free music: iheartradio from Clear Channel

Tune in to more than 750 of America's favorite radio stations, including:

- Exclusive digital stations like Christina Aguilera Radio, CBGB Radio, Radio Weezer, AT40 with Ryan Seacrest, and more.
- Top talk stations from Rush Limbaugh to Dr. Laura
- Traffic reports from 12 major metro areas

### 2 more languages: Japanese and Simplified Chinese

Now you can control Sonos in 9 languages: Dutch, English, French, German, Italian, Japanese, Simplified Chinese, Spanish, and Swedish.

### New alarm settings

Customize alarms for different days of the week.

---

## Version 3.1

## Full support for the new Sonos ZonePlayer S5

- By upgrading to Sonos System Software 3.1, you can add the S5 to your Sonos system and continue to use your existing Sonos products. The S5 is compatible with all previous generations of Sonos ZonePlayers, Controllers, and ZoneBridges.

## Twitter integration

- Tell your friends and followers what you're listening to on Sonos by sending Twitter updates right from your Sonos Controller.
- Start a musical conversation about the songs you love.
- Just press Info View (i) on the Now Playing screen and select Update Twitter Status. Sonos automatically populate your update with the name of the artist and track you're listening to on Sonos and post it to your Twitter profile.
- You must be registered with Twitter to use this feature. To add your account to Sonos go to Settings > Service Setup and follow the prompts.
- Sonos supports up to 5 Twitter accounts per household.
- Available on the Sonos Controller 200, Sonos Controller for iPhone, and Sonos Controller for Mac and PC.

## Graphical Music Menu

- New icons and logos on the Music Menu make choosing your music easier than ever.
- Available on the Sonos Controller 200 and Sonos Controller for iPhone.

## Additional character support for metadata

The Sonos Controller 200 now displays Unicode metadata for the following kinds of characters sets:

- Cyrillic
- Greek
- Japanese
- Korean
- Simplified Chinese

## Updating couldn't be easier

### On the Sonos Controller 200 and Sonos Controller for Mac or PC:

- Sonos will automatically notify you when an update is available
- Select Update Now and click OK

### On the Sonos Controller for iPhone:

- The iPhone App Store will notify you when an update is available. Simply visit the App Store and install your system update

### On the Sonos Controller 100:

- Tap the Music button on your Controller 100 and click on System Settings
- Select Online Updates and click OK

Get in touch with your music: Full support for the new touch screen Sonos Controller 200

Be more compatible: Support for the latest Operating Systems

- On your Mac: Sonos supports Mac 10.4 and higher, including 10.6
  - On your PC: Sonos supports Windows XP and higher, including Windows 7
  - On your iPhone: Sonos supports iPhone OS 3.0
  - New feature provides detailed music information, like artist bios, album reviews, upcoming concerts, and similar artists for select music services (Rhapsody and Last.fm)
- 

## Version 2.8

Update to Sonos v2.8 and get full support for the new Sonos Controller for iPhone™ app. The Sonos Controller for iPhone update is a free download on the iTunes® App Store and includes:

- Full-featured alarm and timer functionality so you can wake up or fall asleep to your favorite music. Set, edit and delete Sonos alarms right from your iPhone.
  - Support for 7 languages. Now you can control Sonos from your iPhone or iPod® touch in English, French, Italian, German, Spanish, Dutch, and Swedish.
  - PC-free setup of your network music folders.
  - Support for DRM-protected WMA files.
- 

## Version 2.7

Way more radio: 25,000 stations, shows & podcasts

- Listen to stations, shows and podcasts across every musical genre, on every topic imaginable, and covering practically every sport in the world.
- Add any station or show to Favorites so you can find and play it in an instant.
- Search for a specific station, show or host. Just enter the call letters or name to find what you're looking for.
- Tune in to radio shows—past, present and future. Catch up on recent shows you missed, archived for your convenience. Listen to the shows you love streaming live, or see what will be playing soon.
- Listen locally and globally. Local radio has all the stations in your neighborhood. Or browse by location to listen to great radio from around the world.

### More free music: Pandora is free on Sonos

Pandora, a new kind of radio personalized just for you, is now free with every Sonos system. Update to Sonos v2.7 and enjoy endless hours of music you're sure to love, everywhere you desire.

3 steps to start enjoying Pandora on Sonos:

- Sign up for a free account on Pandora if you don't already have one
- Add your account to Sonos. On the handheld Controller, choose Music Service Setup under System Settings. Add Pandora and enter your Pandora user name and password.

### Even more music: Last.fm on Sonos

Last.fm is a global music service that works seamlessly with Sonos. With Sonos v2.7 and a subscription to Last.fm you can create personal radio stations based on your musical tastes and discover new music in every room. And you can do it all without turning on your computer.

3 steps to start enjoying Last.fm on Sonos:

- Subscribe to Last.fm, if you don't already have a subscription
- Add your account to Sonos. On the handheld Controller, choose Music Service Setup under System Settings. Add Last.fm and enter your Last.fm user name and password.
- Hit the Music button, choose Last.fm and start a new station or tune in to Tag Radio.

### More control: Support for Sonos Controller for iPhone

Download the free application on the App Store and turn any iPhone™ or iPod® touch into a full-fledged Sonos Controller. Enjoy total control of all your music and all your rooms with the added bonus of a touch-screen interface and pocket-size portability. In English only.

### More languages: Dutch and Swedish

Sonos now adds Dutch and Swedish to its roster of languages supported in the Sonos system software.

### And more

Sonos is switching its Rhapsody streams from 128 kbps WMA streams to 192 MP3 streams so Rhapsody sounds better than ever.

---

## Version 2.6

Get \$200 in DRM-free music downloads for free Every registered Sonos customer will receive:

- 3 DRM-free albums (1 classical, 1 jazz and 1 world) from Classical.com, the digital music service dedicated to the latest and greatest classical, jazz, & blues and world music.
- 50 DRM-free music downloads and 1 free audio book from eMusic, the world's largest retailer of independent music.
- 10 full, DRM-free concerts (MP3) from LiveDownloads.com, the ultimate download source for live concert recordings.

As soon as you've updated to Sonos software 2.6, you can start downloading all that free music. Just visit our downloads page to receive these limited-time offers.

### Enjoy better wireless coverage

With support for SonosNet™ 2.0 and MIMO (Multiple Input Multiple Output) wireless technology, you'll enjoy double the wireless range for both the ZP90 and ZP120.

### Collect more music

Sonos now includes support for larger music collections with up to 65,000 tracks stored on a PC, Mac or Network Attached Storage (NAS) devices

### Store more music

Support for NasBasic firmware allows more than 15 different brands of NAS devices to serve as local music sources.

### Enjoy Mac compatibility

Sonos now supports the latest operating system from Apple® Computer, so Mac OS X Leopard users can use the Sonos Desktop Controller. Mac Software Requirement running OS X v10.4 or v10.5.

---

## Version 2.5

### **Instant access to Napster's multi-million song library all over the house\***

Now you don't need a personal digital music collection to fill your house with great music. With direct access to Napster's® massive music catalogue right on your Sonosamp;reg; Controller, you can find any song and play it in any room.

**Free 30-day trial to Napster** To get you started, Sonos v2.5 includes a free 30-day trial to Napster, the premier global music service that helps you discover great music – no signup, credit card or PC required.

After you update, just hit the Music button on your Controller, select Music Service Trials and that's where you'll find the Napster Trial.

### **With Napster and Sonos you can:**

#### **Enjoy a world of music from the palm of your hand.**

From the emerging local band to international artists, just pick up your Sonos Controller and you've got instant access to Napster's impressive catalogue of music, to play all over the house.

#### **Browse by:**

- Top Artists, Albums and Tracks (by popularity)
- Featured New Releases
- Genre
- Playlists
- Napster Charts
- Napster Radio
- And more!

#### **Find and play everything you want, anywhere you want.**

With the Sonos Controller, you can quickly find any artist, album or track in Napster's catalogue. Then play the same song in every room or different songs in different rooms. Simultaneously.

#### **Bypass your PC.**

Sonos connects directly to Napster over the Internet so you can have millions of songs without ripping, downloading, tagging, or even turning on your PC.

#### **Discover new music.**

Can't decide what to listen to or want to keep up with the latest sounds? Just choose from Napster's vast collection of playlists, New Releases, Charts, Napster Radio, or enjoy a customized playlist with Automix.

#### **Find and play any song, in any room with Sonos Search.**

With a seemingly endless supply of music to choose from, Sonos lets you find exactly what you want so you can play it wherever you want.

#### **Search from the palm of your hand.**

Now you don't have to be in front of your PC to find and play the songs you love. With the Sonos Controller in hand you can search your personal music library or favorite music service by:

- Artist
- Album
- Track

**Plus, lots of great Sonos enhancements including:**

*Better Now Playing display.* For titles, artists or albums with long names, we've added a text-scrolling feature in the Now Playing window so you can see the entire name.

- *More add to queue options.* When adding new music to the queue, you can select "Play now & replace queue" which clears your existing queue and starts playing the new music you've added to your queue right away.
- *Easier playlist saving.* You can edit an existing playlist and then save over it or rename it and save it as a new playlist.
- *Better zone management.* "Drop all zones" lets you simultaneously drop all grouped zones with a single click.
- *New motion sensor option.* You can choose to disable the motion sensor when the Controller is charging so it won't wake up...or wake you up...before your alarm goes off.
- *Better network attached storage support.* Sonos now supports an even broader range of network attached storage (NAS) devices for your growing digital music collection.

*\*Not all service providers are available worldwide. Please check for service provider availability in your country.*

---

## Version 2.3

### **Instant access to SIRIUS Internet Radio all over the house\***

#### **Free 30-day trial to SIRIUS Internet Radio**

To get you started, Sonos® v2.3 includes a free 30-day trial to SIRIUS® Internet Radio, allowing you to instantly enjoy 80+ premium channels in every room—no signup, credit card or antenna required.

#### **With SIRIUS and Sonos you can:**

- **Easily set up and enjoy SIRIUS all over the house.** No wires. No antennas. No fuss. There's no faster or simpler way to install, play and control SIRIUS in every room.
- **Tune in to The Best Radio on the Internet™.** Listen to more than 80 premium channels of music, news, talk, sports, and more—featuring legendary DJs, celebrity hosts and unforgettable guests.
- **Enjoy 100% commercial-free music.** And uncensored talk with Howard Stern, Martha Stewart and more. It's exclusive programming and original formats unlike anything you'll hear on regular radio.
- **Control SIRIUS from the palm of your hand.** Change the channel. Crank the volume. Turn it on or turn it off—all from the comfort of your living room couch.
- **Listen to SIRIUS without being in your car.** And without turning on your PC. Just pick up your Controller and you've got a world of premium radio at your fingertips.

#### **Plus, system improvements including:**

- Better Music Services control and management
- More alarm choices including Pandora and Rhapsody®
- Improved Internet radio reliability with auto restart
- FLAC album art support

*\*Not all service providers are available worldwide. Please check for service provider availability in your country.*

---

## Version 2.2

### **For radio lovers: Instant access to Pandora in every room**

**Free 30-day trial to Pandora** Sonos® v2.2 includes a free 30-day trial to Pandora®, the groundbreaking personalized radio service. With Pandora in the palm of your hand you can instantly create custom radio stations based upon your favorite artist or song, and then play them all over the house

**With Pandora and Sonos you can:**

- **Create custom stations from the palm of your hand.** Just pick an artist or song title and Pandora will build a custom station based on music from more than 10,000 artists.
- **Discover new music.** Expose yourself to music from artists you've never heard or just forgotten—all personalized to your likes and dislikes.
- **Personalize each station.** Use the Controller to rate the songs that are playing and Pandora will instantly refine the station's playlist. It's like having a personal DJ in every room.
- **Play the same station in every room.** Or different stations in different rooms. You can create up to 100 Pandora stations.
- **Listen to Pandora without ever turning on your PC.** Sonos connects directly to Pandora via the Web so you can have a PC-free Pandora experience.

**Plus, system improvements including:**

- Better Music Services control and management
- More alarm choices including Pandora and Rhapsody®
- Improved Internet radio reliability with auto restart
- FLAC album art support

---

## Version 2.1

### Play more music, in more rooms

**Sonos v2.1 adds support for downloaded music from a wide range of stores\* including:**

- AOL® Music Now
- Napster™
- URGE™
- Wal-Mart®
- Yahoo! Music™ Unlimited
- Zune™ Marketplace

### Full support for Windows® Vista™ and Windows Media Player 11

**Enhanced Support for Apple iTunes® 7\*\*including:**

- Improved playlists
- Enhanced volume normalization
- Album artist attribute

*\*Support for downloaded tracks only, does not include streaming feature support. Not all music stores are available worldwide. Please check for music store availability in your country.*

*\*\*Tracks purchased from iTunes Music Store are DRM restricted and not compatible with Sonos.*

---

## Version 2.0

### For music lovers: Plug-and-play access to millions of songs

**You don't need a personal digital music collection to enjoy Sonos.** Now you can plug-and-play millions of songs by subscribing to select music services and then access all that music from the palm of your hand. And because Sonos now connects directly to these music services over the Internet, you can do it all without a PC.

**Sonos ships with millions of songs built-in.** To get you started, Sonos v2.0 includes a free 30-day trial to Rhapsody®, the #1 rated digital music service, allowing you to instantly enjoy music—no sign up, credit card or PC required. *Available in the U.S. only.*

### More things you can do with Sonos and Rhapsody

- **Turn off your PC.** Rhapsody is easier to use than ever before because you don't need to download and install an application or use your PC. Just pick up your Controller and you've got millions of songs at your fingertips!
- **Enjoy Rhapsody with a Mac.** Since you don't need to use the Rhapsody jukebox application software anymore, Mac users can now join in the fun.
- **Browse the Rhapsody Music Guide with your Sonos Controller** and access their huge catalog of music.  
Browse by:
  - Genre and Sub-Genre
  - Charts
  - Key Artists and Albums (editorial recommendations from Rhapsody)
  - New Releases
  - Playlists
  - Radio
  - And more!
- **Discover new music with Rhapsody's Artist Radio.** Just pick your favorite artist and get a custom station that plays music from that artist as well as similar artists. Then best of all, if you discover a new artist you like, instantly add their album to your library.
- **Get expert music recommendations.** Rhapsody's team of music experts has hand-picked the most influential artists and albums from every single genre, making it easier than ever to enjoy the best music Rhapsody offers.
- **Listen to the latest new music.** As soon as a new song is released, it's immediately in your hands...and in your house. Just browse New Releases and hear what's new.

### For Internet radio lovers: More stations, more countries

- **More stations:** Sonos has expanded the Internet radio guide to include more than 300 stations, including new stations from France, Spain and Italy.
- **More categories:** Sonos now features country-specific categories in the Internet radio station guide, so international customers can easily find radio stations broadcast in their native countries.

### For everyone: New alarm clock features

- **Alarm:** Wake up to your favorite music or Internet radio station in one room or all over the house. You can set up to 32 alarms and enjoy volume ramping for a gentler wake-up experience.
- **Snooze:** Once an alarm goes off, hitting the snooze button on the Controller stops the music and causes the alarm to sound a few minutes later.
- **Clock:** The Sonos Controller displays the date and time that can be set automatically and accurately via the Internet.
- **Sleep timer:** Fall asleep while listening to music and Sonos will go to sleep, too.
- **Scheduler:** Set your music to play for a specific time and duration, such as the 5:00 news or a 30-minute treadmill workout.

### For French, Italian and Spanish speakers: More language support

- **French, Italian and Spanish languages** are now supported in the UI of the Sonos Controller and Sonos Desktop Controller.
- **Easily browse and listen to your favorite stations** from France, Italy and Spain. The Internet radio guide now features country-specific categories with new French, Italian and Spanish stations.

**Plus, these new features and enhancements:**

- The maximum library and queue size has expanded to 50,000 tracks.
  - Automatic updates to your music library can be scheduled on a daily basis—ideal for getting daily Audible content or favorite podcasts.
  - Support for the iTunes compilation setting with Album, Artist and Contributing Artist tags makes it easier to browse through your music library.
  - Unsupported WMDRM tracks will not appear in your library.
  - Support for album artist tag.
  - Selecting single items with the scroll wheel is more precise.
  - When adding a track to the Queue while in shuffle mode, the track will be inserted at a random position instead of playing next.
  - Gapless MP3 playback (of files encoded with Lame)
  - Gapless Ogg Vorbis playback
- 

## Version 1.3

### **For book lovers: Support for Audible.com**

- Sonos is now AudibleReady(r) so Sonos customers with a subscription to Audible.com can listen to books, lectures, magazines, and more—all over the house, with control from the palm of their hand. File formats supported: Audible .AA (format 4).
- Spoken Word will be added to the Genre menu.
- *Sonos does not support any Audible content downloaded via iTunes with Apple Fairplay DRM.*

### **For music lovers: Support for Apple Lossless Codec**

- Apple Lossless joins the list of digital audio file formats supported by Sonos. Apple Lossless provides bit for bit CD quality audio but uses half of the hard drive space as uncompressed music files.

### **For album art fans: Bigger and better album art features**

- Enjoy full-screen, full-color album art: to increase the size of the album art, press the OK button on the Now Playing screen on your Sonos Controller or click on the album art in the Now Playing panel on your Sonos Desktop Controller.
- See thumbnail displays of album art, plus additional track information including title, artist and album name for each song, when scrolling through the Music Library or Sonos Queue.

### **For German speakers: German language support**

- German language is now supported throughout the system.
- The Sonos Controller supports German language in the UI.
- The Sonos Desktop Controller supports German in the UI. On Windows-based machines, choose the language from Sonos Preferences (You should also set your Windows language to German.) On the Mac, your OS system language should be set to German.

**Plus, these new features and preferences:**

### **Playlist management**

- Playlists can be renamed using the Sonos Controller or Sonos Desktop Controller.
- Tracks can be moved in the Queue using the Sonos Controller or Sonos Desktop Controller.
- The Sonos Desktop Controller setup for Windows now identifies iTunes playlists if your music is stored in a location outside of your 'My Music' folder.

- Playlist locator automatically reconnects playlists with files that have been moved.

#### **Music management**

- When pressing the OK button, a new pop-up menu appears giving users the option to play now, add to end of queue or play next in queue.
- An 'All Tracks' option is available in both albums and playlists making it easier to select a whole album or playlist on your Controller.
- Tracks in the 'Folders' view (formerly Browse By Folder) can be ordered by: Track Title, Track Number or Filename (from Advanced System settings on the Controller, or Preferences on the Desktop Controller).
- Keyboard shortcuts for Music Browse are now available on the Desktop Controller for the Mac.

#### **Metadata enhancements**

- Support for the Disk number metadata tag
- Support for Ogg Vorbis/FLAC Composer tag
- Support for Foobar2000 ReplayGain tags

#### **Enhanced security**

- SonosNet(tm) now uses 128bit AES encryption providing greater wireless security.

#### **For Rhapsody subscribers**

- The Desktop Controller for Mac will now let you select music from your Rhapsody account (Rhapsody needs to be running on a Windows computer on your network).

#### **For Musicmatch users**

- File Sharing Permission can be optionally reset when updating the Music Index on the Windows Desktop Controller.

#### **And more**

- AIFF volume normalization
- Selected Zones are remembered in the Zone Menu when the Controller comes out of deep sleep or the Desktop Controller is launched.
- MP4 music file format now supported
- Support for EXIF album art on the Controller
- Enhanced help menus

---

## **Version 1.2**

#### **For Internet radio lovers: Support of Windows Media(r) Audio Internet Radio Stations:**

- Listen to over 100 Internet radio stations that are continuously updated by Sonos
- Add your own MP3 or WMA streaming internet radio stations (now available for Mac and PC)

#### **For Mac lovers: Introduction of the Sonos Desktop Controller (DCR) for the Mac:**

- Support for Mac OSX 10.3 and OSX 10.4 (Panther and Tiger)
- Setup assistant provides easy access to your iTunes(r) library of music and supports the latest iTunes(r) 4.9 release. Your music library, podcasts and playlists are all accessible

- In addition to the setup assistant, the Desktop Controller for Mac provides full control over your Sonos system, similar to the Desktop Controller for PC\*

#### **For Power music lovers:**

- Power scroll: ability to browse alphabetically in your music library to find your favorites fast on the Controller
- Increase of library index capacity from 30,000 tracks to 40,000 tracks
  - Ability to view tracks within all supported playlist formats
  - Support for bitmap album art (PNG, JPEG, BMP and GIF)
  - Support of volume normalization settings for iTunes(r) (MP3, AAC files), Windows Media(r) Player (WMA, MP3 files) and FLAC encoders using ReplayGain. (Note: In iTunes(r) you can set this preference via selecting the "soundcheck" setting. In Windows Media(r) Player you get this preference via selecting "volume leveling")
  - In addition to 44.1 kHz, Sonos now supports the following sample rates for local tracks and internet audio: 48kHz, 32kHz, 24kHz, 22kHz, 16kHz, 11 kHz, 8kHz

#### **New Preferences and Features:**

- Line-in gain adjustment support
- Line-in naming support
- User adjustable LCD and button backlight brightness controls; which gives the ability to adjust for user environment and battery conservation
- Allow power light on Zone Player to be turned off
- Save EQ settings across reboots/upgrades
- Ability to resize panes in the DCR
- Improved detection of PC firewalls
- Support for iTunes® playlists with tracks stored in non-default location

*\*Note: The music services tab (for Rhapsody® music selections) is currently not available on the Mac DCR.*

---

## **Version 1.1**

Update to Sonos v1.1 with Rhapsody 3.0 support\* and native decoder support for AIFF, FLAC (lossless), and Ogg Vorbis.

To update your Sonos Digital Music System to v1.1, use your Handheld Controller or Desktop Controller Software to initiate an update. If you are not currently registered you will be prompted to register before the upgrade commences.

#### **Having problems getting Rhapsody to work?**

If you are unable to play Rhapsody music on your PCs speakers then call Rhapsody support @ 866.420.5833 Option #2.

*\*in markets where Real Rhapsody is available.*

---
