1 Connect your Sonos PLAY:5 to power

While the PLAY:5 is designed to produce great sound wherever it's placed, Sonos recommends horizontal orientation for a wide sound stage.

2 Optional

If you purchased a Sonos BOOST, connect it to your router now with an Ethernet cable (supplied) and plug it into power. Otherwise, please skip this step.

Note: Connecting a Sonos BRIDGE, BOOST or Sonos player to your router with an Ethernet cable creates a separate rock-solid wireless network exclusively for your Sonos speakers. If you don't connect the Ethernet cable, Sonos joins your home's wireless network. For more information, go to www.sonos.com/rock-solid-wireless.
